

Jane AI Scribe Consent Form

Consent Form for AI Scribe Dictation Technology

Purpose of AI Dictation

To improve efficiency and accuracy in clinical documentation, our clinic uses an Artificial Intelligence (AI) scribe dictation tool as part of our electronic medical record (EMR) system, Jane App. This tool transcribes verbal interactions between you and your healthcare provider into written documentation used for your medical record.

How It Works

During your appointment, the AI scribe may record and transcribe spoken dialogue between you and your provider. These voice recordings are automatically converted into a summarized text note and reviewed by your practitioner before becoming part of your official chart. The AI scribe is not involved in making clinical decisions.

Data Handling and Security

Jane App uses stringent security protocols to ensure your data is handled with care and in accordance with applicable privacy laws. Key safeguards include:

- Data encryption and secure access controls
- Automatic deletion of raw audio recordings once transcription is complete
- All AI-transcribed content is used solely for medical documentation
- Personal information is not stored longer than necessary and is kept within Canada (where applicable)
- AI Scribe is HIPAA, PIPEDA, and PHIPA compliant
- Your data is not used to train AI models

You may view Jane App's privacy policy for more details: <https://jane.app/guide/jane-s-ai-principles>

Patient Rights

You have the following rights in relation to the use of AI dictation:

- Access: You may request access to your medical records, including those created using the AI scribe.
- Correction: You can request corrections to any inaccuracies in your charted notes.
- Withdrawal of Consent: You may withdraw your consent at any time. This will not affect your care but may reduce documentation efficiency.

Benefits

- Improved efficiency in charting and follow-ups
- Reduced administrative burden for your provider
- More accurate documentation of the clinical visit

Potential Risks

- Minor risk of transcription error or misinterpretation by AI
- Possible difficulty recognizing accents or variations in speech

Voluntary Participation

Your participation in AI-assisted documentation is completely voluntary. Declining or withdrawing consent will not impact the quality or accessibility of your healthcare services.

Patient Consent

I have read and understood the above information regarding the use of AI scribe dictation technology. I have had the opportunity to ask questions and receive answers. By signing below, I voluntarily consent to the use of AI scribe dictation during my clinical visits.
